

Trail Torch LED Light Bar Installation Instructions

Specifications:

Light Source: 13 Ultra Bright White LEDs

Power Input: 4.5 to 6.0 volts DC

Current Draw: 260mA

Light Output: 156,000 mcd

CAUTION

The Trail Torch LED light bar **cannot be connected straight to a typical 2S Lipo or 6-cell Nimh battery pack**. Connecting to an improper power source **WILL CAUSE THE LIGHT BAR TO FAIL AND WILL VOID THE WARRANTY**.

Installation:

Connect 3-pin connector to an available auxiliary (AUX) port on your receiver. Alternately, you can power the light bar with an external 3 or 4 battery holder and AAA or AA batteries.

If powered from the vehicle pack, use a BEC to regulate voltage to 5 or 6 volts.
